Are you sure that your insurance protects you, your family and your assets? **Contact your Account Manager and make the diagnosis.**

Whether it's for personal or asset protection, or because of a legal obligation, analysing the most suitable cover can be complex. The **Risk Insurance Advisory Service** is free and helps you the most suitable insurance and cover for each case.

What is it

This is a **customised insurance diagnosis and advice service** carried out by your Account Manager, which allows you to **identify your individual and family protection needs** in a wide range of areas: health, home, car, life, serious illnesses, personal accidents, domestic staff and pets.

The result is a **customised recommendation with the most suitable insurance, cover and options** for your profile, personal situation, assets and family. It will be based on the information you provided in the Risk Insurance Needs Diagnosis Questionnaire, namely regarding your requirements and insurance needs, objectives and current insurances.

This diagnosis is free and drawn up as part of Millennium bcp's Risk Insurance advisory service. **The Bank does not base its advice on an impartial and personal analysis.**

In the recommendation we have excluded products that you already have in your portfolio at Ocidental, but we will present a proposal for products that you don't already have or that you have at another insurance institution.

Insurance is at Millennium!
